

Al Zaabi Healthcare
Corporate Profile

Vision Statement

- Leadership through excellence in healthcare with care & compassion.

Mission Statement

We believe that Adam & Eve has a commitment to the community & define our mission accordingly as:

- Providing competent, innovative & affordable solutions for healthcare needs.
- Promoting wellness & healthcare awareness.
- Advancing excellence in therapeutic & preventive medicine.
- Demonstrating social responsibility by choosing & properly using sustainable resources.
- Fostering a participative culture with a common vision.
- Contributing to better quality of life for the entire community.

Where Health Meets Care

Adam & Eve is committed to becoming the paramount in the healthcare industry. On top of being a specialized medical centre, we strive to muster the experts from every medical field to deliver the best and the most comprehensive healthcare solutions at an affordable cost.

Treating patients as our friends, we aim to harmonize therapeutic expertise, technological advancements, and professional care with empathy so we can bring value to our patients and give an impeccable performance.

As a subsidiary of Saeed Al Zaabi Group of Companies, our corporate core values of quality, integrity, and reliability remain cohesive here at Adam & Eve. We provide primary care as well as preventive medical services with a wide range of healthcare packages to meet our patients' needs. Moreover, we are unceasingly expanding and upgrading our prowess to serve the region's healthcare demands.

- Driver's medical fitness

Occupational Health Department

Cultivating and maintaining a healthy workplace is a vital investment for both employees and businesses.

Effective occupational health programs have a positive impact on staff productivity and the healthy lifestyle of employees, their families and entire communities.

Unhealthy Workplace

3x Healthy employees are **THREE TIMES** more productive than unhealthy individuals.

3x People working in organizations who neglect health and well-being are **THREE TIMES** more likely to describe their workplace as undesirable.

4x Companies who undermine the importance of health within the workplace are **FOUR TIMES** more likely to lose their employees within 12 months than those who promote a healthy environment.

9x Unhealthy employees take up to **NINE TIMES** the amount of sick leaves in comparison to healthy employees.

20 If an employee experiences a 20% decrease in emotional well-being, this leads to a 10% reduction in their overall work performance.

Healthy Workplace

- ↑ Worker morale and engagement
- ↑ Team solidarity
- ↑ Individual work performance and productivity
- ↑ Attraction and retention of employees
- ↑ Improved corporate and recruitment image
- ↑ Individual health knowledge
- ↑ Job satisfaction
- ↑ Improved camaraderie between workers and management
- ↑ Return on training and development investment
- ↓ Workplace injuries and associated expenses
- ↓ Absenteeism and prevalence of sick leaves
- ↓ Incidents of attending work when sick

Family Medicine

General Medicine Department has set a higher standard of healthcare to reassure every family that our practitioners are well-equipped to treat people of all ages. Our team of medical and para-medical staff are endowed with abundant knowledge to handle both minor and major ailments of their patients.

Dermatology

Our Dermatology Department deals with skin, hair, and nail diseases. We offer clinically proven treatments that will aid dermatological disorders, including venereal diseases. On top of addressing our patients' skin, hair, and nail concerns, we also help them in managing acne, scars, pigmentation, hair loss, ageing skin, and more through advanced cosmetic dermatology services. With treatments backed by science, you can stay calm and let your hair down as our specialists develop proven solutions for your needs.

Treatment Procedures

- Acne scar treatment – Micro needling and Chemical Peel Treatments
- Radio surgery for benign conditions such as warts, moles and skin tags.
- Cryosurgery for conditions such as warts and keloids.
- Auto-implantation therapy for the treatment of multiple viral warts.
- Intra-lesional therapy for the treatment of keloids and alopecia areata.
- Excision of benign and malignant skin lesions including narrow hole extrusion therapy for cysts and lipomas.

Cosmetic Therapy

- Chemical Peels for acne, pigmentation, and photoageing
- Anti-aging treatments like Botulinum Toxin and filler injections
- Mesotherapy for hair loss, under eye dark circles and facial rejuvenation, and scar revision techniques..

Laser Treatments

Laser Hair Removal

Laser hair removal is an advanced hair removal process that exposes your skin to pulses of laser light in order to disable hair follicles. This revolutionary treatment exhibits long-lasting solutions for decades.

Benefits of working with certified dermatologists

Although laser hair removal has brought an option to do the operation by yourself at home, it is still the certified dermatologists who know better and have the abundant experience and tools perfect for you. Below are the reasons why you should not consider conducting laser hair removal alone.

Precision: Superb technology enables the technician to target dark rough hairs on the body without harming the skin.

Safety: It is proven and tested that medical procedures are painless and safe.

Swiftness: Using pulses of laser light, it can treat the smallest sections of your skin and face in minutes, while large areas like the back or legs take about an hour.

Convenience: Results like your hairs were never there. Patients who attend sessions regularly experience lasting effects.

Slimming & Body Contouring

The scientific approach on sculpting your body

Our life-changing weight loss programs and slimming treatments in Abu Dhabi help our patients have an active and healthy lifestyle and achieve the best figure of their bodies.

Through the use of our top-tier weight-loss technology, melting those unwanted body fats away will never be exhausting. Without committing to strict diet programs and strenuous physical activities, we will provide you a faster, more efficient, and more effective solutions that you will never regret.

We will provide specific treatments that your body needs, be it cellulite removal, fat reduction, skin tightening, and the like. Our experts will be with you until you reach your weight-loss goal.

- Weight Loss Treatments
- Tuck Therapy
- Slim Trim Therapy
- Fat Freezing
- Powershaping
- Body Therapy
